- Streams
- Roads
- Railroads

This map is based upon best available information. It is intended for planning purposes only and is not guaranteed to show accurate measurements.

0 .25 .5 1 mile

Note:
This map is a schematic of the proposed flood control alternative. Actual dimensions, configuration, plan form geometry, and specific location of proposed features such as the "two stage channel" conveyance improvement, "minimal disturbance" conveyance improvement, "channel and habitat reconstruction", Bingaman Creek overflow channel, Peasley Canyon sediment trap and other features are yet to be determined. The channel widths on this map are not necessarily to the actual scale of the proposed reconfigured channels.
